ABOUT MURCIA

Murcia is a Spanish city, capital of the municipality of the same name and of the autonomous community of the *Region of Murcia*. It is the center of *Huerta de Murcia* region and its metropolitan area, being located on the southeast of the Iberian Peninsula, on the banks of the *Segura River* and about 40 km. from the *Mediterranean Sea*.

REGION OF MURCIA

- **Cities and towns:** 45
- **Population:**
 - Total: **1,493,898**
 - Murcia **447,182**
- **Area**
 - Total: **11,313 km²**
 - Murcia **881,9 km²**

Although there are archaeological remains from the Bronze Age, the *name of the city* comes from **Roman times**, at that time it was called **Murtia**.

Today it is a region that lives off **tourism**, **industry**, and its **fertile lands**, earning the nickname “Huerta de Europa/ Europe’s vegetable garden”.

THE WEATHER

Murcia is located on a plain, about **40 km from the coast**, in the southeast of Spain, and has an **almost Mediterranean climate**, as it has a particularly pronounced aridity and a very hot summer.

In **WINTER** there are several mild periods, while occasionally there can be cold periods, with *highs of around 10° C* and light night frosts.

In **SUMMER**, the position of the city, in the south of Spain but at a certain distance from the sea, and with a

mountain range that partially isolates it from the sea (the South Mountain Range), makes the heat especially intense. Every year there are **torrid days**, in which **40° C** are reached or exceeded.

The Region of Murcia offers between **120 and 150 days of sunshine** a year and an average temperature of 18° C, with hot summers and mild winters. In general, rainfall is scarce (approximately 300-350 mm / year) throughout the regional territory, with summer being an eminently dry season.
